

OSMI Australia (“OSMI”) is a renewable energy development company based in Victoria, with a particular focus on wind energy over forestry plantations and strong community benefit schemes.

At OSMI, we strive for a net positive environmental outcome. We aim for best practice in all aspects of our business operations.

This includes:

- A commitment to continuous improvement to processes and technologies as they become available
- To go beyond compliance with industry legislation whenever possible
- Contributing to state and federal government environmental targets such as the renewable energy targets
- To minimise the environmental impacts of the organisation including general business operations, procurement, construction and operational phases.
- To monitor and improve our environmental performance through the implementation of an environmental management plan
- To ensure sensitivity to local environments, including both the natural environments and the human, social communities that are encountered during operations, by seeking a deeper understanding of local environments and through the development and implementation of community benefits schemes and sustainability programs as appropriate
- Ensuring the development and implementation of best practice EMPs and CEMPs
- We continue to seek ways to improve our environmental practices and minimise our impacts to local, regional and global environments, to achieve our goal of helping to improve the overall environmental health of the planet.
